

# BUY CATBASE AND ADD-ONS FROM OUR SECURE STORE

## CATBASE APPLICATIONS

[View Cart](#)

Our software is available in two Editions:

- **Enterprise Edition:** Offers all features except ODBC connectivity.
- **Data Chameleon Edition:** Offers all features, including ODBC connectivity (connect your CatBase database directly to another database, such as MySql or SqlServer, to import/export/publish data).

It's also available in both Single-User and Multi-User versions:

- **Single-user:** The software is installed on your desktop or laptop and the database can be used by only one person.
- **Multi-User:** The software and database are installed on a server, and can be accessed by multiple users or "clients". The basic multi-user system includes two user licences. You can add as many additional user licences as you need. Note that they are concurrent licences: you can install the Client software on any number of computers but only the number of licences you've purchased can log in at the same time.

### Platforms

CatBase is available for Windows and Macintosh.

For Multi-User versions, the Server can be either Mac or Windows, and the Clients can be any combination of Mac and Windows.

All prices are quoted in UK £ Sterling.

### Single-User Versions

One person can use the application.
