# Catalogue Management Software

CatBase is the most flexible catalog management software available.

Overview of the main features:

- Available for Windows and Macintosh.
- Single-user and multi-user (network) versions.
- Use CatBase to manage your catalog data, or import the data from another source such as a spreadsheet, MySql, SqlServer database, csv, XML or almost any other data source.
- Define the tables, fields, and relationships you need.
- Define your data entry forms and list views.
- Quickly and easily publish your data as a catalog, price list, product sheets ... Create any number of publishing styles. See some example publications on the Examples page.
  - Include any number of images for each product
  - Create lists of variants as beautifully formatted tables
  - Create rules to determine what data to include, how to style certain data, and many other options.
  - Maintain Sets of data to review or publish - e.g. New products; all Chocolate products; products within a certain price range; products with a low stock level, etc.
  - Create bar codes and QR codes and include them in your publications
  - Publish with Adobe InDesign, QuarkXPress, Microsoft Word.
  - Select any field for indexing (e.g. Product Code, SKU, etc.
  - Create hyperlinks.
  - Create cross-references (InDesign only)
- Produce reports and labels.
- Create automatically schedule events with the Event Scheduler - e.g.: import a pricing update file every night; publish an updated price list every Friday.
- Maintain an Audit Trail of all modifications made to the database.
- The built-in Backup feature ensures that you always have an up-to-date backup of your database.
- Use updated data to update an existing publication (with InDesign or QuarkXPress) - e.g. price updates.
- Export data in various formats - Excel spreadsheet, XML, csv files, tab-delimited files, and directly to another database such as MySql or SqlServer.
- Send customised emails to contacts in your database.
- Send customised Letters to contacts in your database.
- A free, fully functional trial version is available.
