

# WHY SPEND HOURS ... DAYS ... OR EVEN WEEKS CREATING YOUR CATALOGUE, DIRECTORY, OR PRICE LIST? LET CATBASE DO IT FOR YOU IN MINUTES!

## ***RAPIDLY TURN YOUR DATABASE OR SPREADSHEET INTO A PERFECTLY- FORMATTED PUBLICATION***

CatBase is a database publishing application which automates the process of formatting data ready for publication. Working with your chosen publishing destination (QuarkXPress, Adobe InDesign, Microsoft Word, HTML documents, XML files, etc.), CatBase adds special tags to automatically format the information and (most publishing destinations) pictures for you.

Here's a video that demonstrates how CatBase produces a beautiful illustrated product catalog in just five minutes, working with Adobe InDesign:

Data can also be published to other destinations such as QuarkXPress, Word, XML, Excel, and text files; and to other databases, such as MySQL, SqlServer, etc. ([Data Chameleon](#) edition).

### **Imagine how much time this will save you!**

Instead of spending hours or even DAYS manually formatting your data, CatBase will do it all automatically in minutes!

### **REST ASSURED THAT EVERYTHING IS FORMATTED CONSISTENTLY**

With CatBase doing the grunt work, you can be sure that no human error creeps in when your publication is being prepared: everything will be formatted consistently, and the correct pictures will be placed with each item.

### **WINDOWS AND MACINTOSH**

CatBase runs on Mac OSX and Windows 2000 or better. There are single-user and multi-user versions; the multi-user version supports mixed networks.

### **CATBASE IS THE PERFECT PARTNER FOR ADOBE INDESIGN**

InDesign offers lots of great publishing features and CatBase fits in perfectly with your InDesign workflow. Automatically create and fill text and picture boxes ([Xtags](#) plugin required); create index entries; automatically create hyperlinks; create all kinds of tables; apply Object Styles to text and picture boxes. You simply select your data formatting options in CatBase's easy-to-use dialogs and CatBase and InDesign do all the tedious, time-consuming, error-prone formatting work for you.
