

Publishing Data with CatBase: an Overview

Data publishing simplified!

CatBase makes it easy to publish your data in many different ways, using various publishing destinations. Just a few steps to publishing your data ...

1. Get your data into CatBase's database. You can [enter it manually](#) or [import your data](#).
2. Create a [Publishing Project](#).
 - Create a [Set](#) to tell CatBase which records you want to publish.
 - Set up a [Publishing Style Sheet](#) to tell CatBase what you want to publish and how you want it formatted.
3. Publish your data by clicking the **Publish Now** button in your Publishing Project.
4. Place the published file into your chosen publishing destination.
5. All the data is automatically styled as you specified; pictures can be placed as well!

CatBase Works with all the Major Publishing Solutions

- QuarkXPress
- InDesign CS 5 or later (including all versions of Creative Cloud)
- Microsoft Word, or any program that supports RTF tags
- HTML
- XML
- Excel
- Delimited text files
- SQL Server ([Data Chameleon Edition](#))
- MySql ([Data Chameleon Edition](#))
- An ODBC-compliant data source ([Data Chameleon Edition](#))

See some examples of how this all works ...

Take a look at some demonstration and training videos on our [CatBase Academy videos](#) page
